Remember:

- **PTA - Potential Trading Area**
- **Moving Averages plotted on the charts: 21 and 50 (We rarely put averages on the chart just to see the market condition. our main guide is ALWAYS volume).**

Risk Management:

- **Position Building (Long Trades): NO SL (When building a position, we assume that we will buy the assets in several transactions, most often two or three transactions. The point is that we divide the capital allocated to a given stock into 2-3 parts. We build positions mainly on shares).**
- **R:R 1/3. We set the SL and want to achieve a return on risk of 3:1**
- **If you are trading in leveraged positions, ALWAYS use SL**
